

1. Project Master Information

Field Name	Description
Project id	Unique project identifier
Project name	Name of the project
Client id	Associated client identifier
Department id	Department responsible for project
Project manager id	Assigned project manager
Project manager name	Name of assigned project manager
Project type	Fixed Price, Time & Material, Internal
Project category	Client, Internal, Strategic
Project status	Planning, In Progress, On Hold, Completed, Cancelled
Priority	Low, Medium, High, Critical
Project start date	Project start date

Project end date	Expected completion date
Budget	Approved project budget
Actual cost	Actual amount spent on project
Revenue generated	Revenue earned from project
Profit margin	Profit earned after deducting cost
Completion percentage	Percentage of project completed
Project health score	Overall project performance score
Project complexity	Low, Medium, High
Delivery status	On Track, Delayed, Critical
Delay days	Delay from planned timeline

2. Project Team & Resource Information

Field Name	Description
Allocation id	Resource allocation identifier

Project id	Associated project ID
Employee id	Assigned employee identifier
Employee name	Name of assigned employee
Employee designation	Employee role/designation
Department	Employee department
Project manager id	Manager responsible for project
Project manager name	Name of project manager
Reporting manager id	Reporting manager identifier
Reporting manager name	Reporting manager name
Team id	Team identifier
Team size	Number of employees working on project
Role on project	Developer, Analyst, QA, Lead, Consultant

Allocation start date	Resource allocation start date
Allocation end date	Resource allocation end date
Allocation percentage	Employee allocation percentage
Utilization percentage	Resource utilization percentage
Billable rate	Cost per billable hour
Billable status	Billable or Non-billable
Cost to company	Resource cost
Work mode	Remote, Hybrid, Onsite
Employee status	Active or Exited

3. Project Phase Information

Field Name	Description
Phase id	Unique project phase identifier
Project id	Associated project ID

Phase name	Name of project phase
Phase start date	Start date of phase
Phase end date	End date of phase
Phase status	Not Started, In Progress, Completed
Order sequence	Sequence of phase execution

4. Milestone Information

Field Name	Description
Milestone id	Unique milestone identifier
Project id	Associated project ID
Phase id	Associated phase identifier
Milestone name	Name of milestone
Due date	Planned milestone completion date

Achieved date	Actual completion date
Milestone status	Pending, Achieved, Delayed, Cancelled
Milestone completion percentage	Completion percentage of milestone

5. Task Information

Field Name	Description
Task id	Unique task identifier
Project id	Associated project ID
Phase id	Associated phase ID
Assignee id	Employee assigned to task
Employee name	Employee performing task
Task title	Task description/title
Task category	Development, Testing, Documentation, Analysis

Task status	To Do, In Progress, In Review, Done, Blocked
Priority	Task priority level
Estimated hours	Planned effort hours
Actual hours	Actual effort spent
Due date	Task deadline
Completed date	Actual completion date
Rework flag	Indicates repeated work
Blocker reason	Reason task is blocked

6. Timesheet Information

Field Name	Description
Timesheet id	Unique timesheet identifier
Employee id	Employee submitting timesheet

Employee name	Name of employee
Project id	Associated project ID
Task id	Associated task ID
Work date	Date work was completed
Hours worked	Number of hours logged
Overtime hours	Additional working hours
Billable flag	Indicates billable or non-billable work
Approved by	Approving manager/employee
Work notes	Employee work comments/details

7. Project Risk Information

Field Name	Description
Risk id	Project risk identifier

Project id	Associated project ID
Risk description	Description of project risk
Probability	Risk occurrence probability
Impact	Business impact severity
Risk severity score	Numeric risk severity
Risk status	Open, Mitigated, Closed, Escalated
Escalation level	L1, L2, L3
Mitigation plan	Risk resolution strategy
Resolution timeline	Estimated resolution duration
Owner id	Employee responsible for risk
Owner name	Risk owner name

8. Historical Project Information

Field Name	Description
Historical id	Historical project record identifier
Project id	Associated project ID
Project name	Name of project
Project status	Historical project status
Budget	Project budget
Actual cost	Actual cost incurred
Revenue generated	Revenue earned
Profit margin	Project profitability
Priority	Project priority level
Project manager id	Assigned project manager
Project manager name	Name of project manager

End date	Project completion date
Valid from	Effective start date
Valid to	Effective end date
Current flag	Indicates current project record
Change reason	Scope Change, Budget Revision, Timeline Shift, Re-prioritized
Record created at	Record creation timestamp

9. Project Performance

Field Name	Description
Planned budget variance	Difference between planned and actual budget
Timeline variance	Difference between planned and actual timeline
Resource utilization score	Team utilization score
Team productivity score	Overall team performance

Project success score	Overall project performance indicator
Milestone achievement rate	Percentage of milestones completed
Task completion rate	Percentage of completed tasks
Risk count	Total number of project risks
